EXECUTIVE SUMMARY

B.S. ABDUR RAHMAN CRESCENT INSTITUTE OF SCIENCE AND TECHNOLOGY

B. S. Abdur Rahman Crescent Institute of Science and Technology (BSACIST) was founded by Alhaj Dr. B. S. Abdur Rahman Sahib. Through the long history of 40 years of excellence, the institution has offered access to a wide range of academic opportunities. With 54 programmes, grouped under 12 schools, 31 undergraduate programmes, 23 postgraduate programmes, and Ph.D (all departments). BSACIST is a rising stalwart in higher education with promising quality, security and placement.

VISION

- BSACIST strives to be a 'Research Intensive Institution' through various quality enhancement and sustainable initiatives.

MISSION

- To offer Ph.D programme in all the departments of the institutions
- To offer Research Fellowships (JRF & SRF) in all the departments to attract young talents
- To conduct periodical review meetings for research scholars to ensure quality
- To disseminate the research findings through publications
- To introduce innovative schemes to encourage quality research and to increase number of research publications
- To introduce a conducive ambience so as to promote research culture

SALIENT FEATURES

- Accredited with 'A+' grade by NAAC
- Crescent Innovation & Incubation Council (CIIC)- a Business Incubator with 120 startups
- Career guidance & counselling

CRESCENT INNOVATION AND INCUBATION COUNCIL (CIIC)

Crescent Innovation & Incubation Council (CIIC), an innovation arm of BSACIST was incorporated in 2019 through entrepreneurial activities that started in early 90s. CIIC aims to create an impact on economic development and community wealth. The main strategy is to convert the patents and publications into commercial products. CIIC supports the startups with Triple 'M' strategy (Mentor, Money and Market) transforming innovation into scalable business models with high productive impact, encouraging inter-disciplinary advancements both nationally and internationally.

VISION

To become a University-based Startup Incubator of Excellence, reforming entrepreneurial student aspirants and startups into profitable entities, thereby creating an impact on the economic development and community wealth.

MISSION

Recognise & nurture startups in technology development

01

Create and promote collaborative networks through partnerships between academia, industry and government.

02

Create facilities through establishing Centres of Excellence.

03

Increase and advance the in-house operational skills for leveraging entrepreneurial expertise and resource network.

Vision...

To become a University-based Startup Incubator of Excellence, reforming entrepreneurial student aspirants and startups into profitable entities, thereby creating an impact on the economic development and community wealth

CIIC FACILITIES

1. CENTER FOR LIFE SCIENCE

Crescent Biotech Incubation for Nursing received a fund of 1.80 crore from BioNEST, BIRAC, Department of Biotechnology, Ministry of Science & Technology, Government of India, during the period of 2019-2022. The funds were used to establish well-equipped labs for startups, particularly in the fields of Molecular Biology,

FACILITIES :

- I. Microbiology Lab
- II. Molecular Biology Lab
- III. Cell Culture Lab
- IV. Bio Process Lab
- V. Microalgal And Nano Biotechnology Lab
- VI. Food Testing lab - NABL
- VII. Analytical Lab
- VIII. Instrumentation Lab
- IX. Plant Tissue Lab
- X. Computational Biology Lab

2. INDUSTRY 4.0

CiiC has been working on one of the verticals of Industry 4.0. As part of this initiative, we have collaborated with Intel and established Intel Unnati Data-Centric Labs. To establish world-class facilities and experts/mentors community in Industry 4.0, thereby creating impact on the Start-up Ecosystem. Recognize & Nurture potential startups and

i) Intel - AI/ML Lab

- Artificial Intelligence & Machine Learning already changed the perspective of a common man beyond the imagination on the day-to-day life process ever before.
- AI/ML Lab has state-of-the-art lab facilities in associated with Intel. It is one of its kind to conduct advanced research activities in the field of AI/ML. We are also authorized to conduct intel-certified skill development courses for Start-ups, Students and Faculties.

ii) Intel – IoT Lab

Internet of Things is the emerging technology that connects the physical devices to the cyber systems or Internet. IoT lab facilitates the communication of sensors data or device control through interfacing the controllers or processor to the internet using cloud

iii) Intel – Cloud Computing Lab

Cloud computing is the on-demand availability of computer system resources, especially data storage and computing power, without direct active management by the user. It's the hard core technology used in AI & IoT with an exclusive cloud offerings based on the technology requirement along with mentoring.

v) Smart Manufacturing Lab

Smart manufacturing is a sector in which manufacturing equipment connected with intelligent systems i.e., computers to increase the productivity. Smart manufacturing differs from conventional manufacturing by decreasing the product lead time in production and also easily adaptable to design changes

3. OTHER CENTRE:

Centre for Intellectual Property Rights(CIPR) & Technology Transfer Office (TTO)

CIPR & TTO protect the innovative ideas of the inventors from commercial exploitation and handles the IP and promote transfer and commercialize patented technologies

CIIC shall act as Business Development Partner with CCAMP, Bangalore exclusively for Office of Technology Transfer (OTT) in the territory of Chennai, Tamil Nadu and identify potential Clients including but not limited to Institutions, Organizations, Individuals, Startups, Corporate Entities

ACTIVITIES DONE:

- Conducting awareness programs on IPR and technology transfer for Educational Institutes, Startups, and Industry MSME
- Celebrating IP day in association with the IPR office Chennai.
- Filing and Prosecution of Patents, Trademarks, Design registrations, and Copyright applications
- Filing of IPR applications under SIPP scheme for Startups
- Filing PCT applications for Startups and University
- Participation and Membership in STEM conferences for technology transfer
- Licensing of technology from University to Industry

ANNUAL REPORT 2022-23

MADURAI CAMPUS

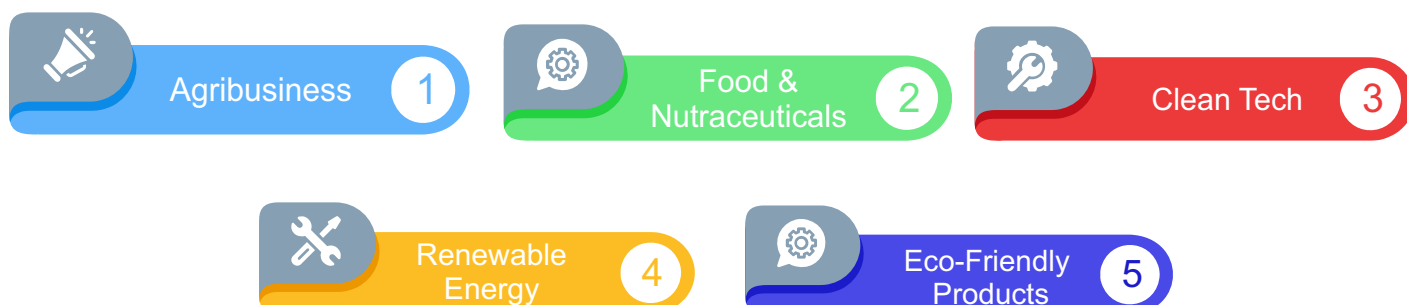

CIIC has expanded to Madurai to nurture rural startups from Tier 2 & Tier 3 cities of Tamil Nadu.

CIIC will tap innovation arising from rural areas by nurturing the students from universities & colleges of Tier 2 & Tier 3 cities by providing them with entrepreneurial skills, taking these ideas and innovation to the global market reach. CIIC- Madurai is targeting innovations arising from Tier 2 and Tier 3 cities. Nurturing rural innovations arising from locations within a radius of 100km from CIIC-Madurai office.

- Involving students of Food processing to acquire skills in processing & marketing techniques
- Imparting training to learn the state-of-art-techniques for business promotion
- Empowering women of self-help groups of the region to practice the scientific way of production, packing and marketing their own food products

Crescent Innovation & Incubation Council, Madurai Campus initiated on November 2021 for supporting Start-ups and MSMEs in the Tier 2 & 3 Cities. CIIC Madurai currently incubated 20+ Start-Ups and having 10,000 Sq.Ft facility for Co-Working Space.

INDIA'S TOP 100 STARTUPS ANNOUNCE THEIR ARRIVAL

A new India has taken wings, soaring towards unseen possibilities and a better future. Leading the way are the country's innovators and entrepreneurs, who are using technologies of tomorrow to solve today's challenges. Their heroic endeavours finally found the stage it deserves, with Leap To Unicorn, a startup mentoring and funding program created by IDFC FIRST Bank, in association with Moneycontrol and CNBC-TV18, which has helped shine the spotlight on India's top 100 startups.

It began with 5500+ startups applying to be part of the program. About 600 were selected to undergo a month-long bootcamp, during which business leaders and industry

veterans shared lessons in startup funding and operations. Another round of pitches later, an elite jury of investors and VCs selected the top 100 startups, representing different sectors and channeling unique solutions to solve health, financial, technological, logistical and sustainability challenges, while offering new consumer experiences and services as well.

The top 100 startups are true pioneers, who demonstrate the power of hard work and ingenuity. As the first batch of successful startups to emerge from the Leap To Unicorn initiative, these 100 will continue to occupy a special place in the pantheon of India's startup champions.

Denvik Tech raises strategic investment

Times News Network

Chennai: Denvik Technology, a Chennai-based provider of IoT solutions has raised a strategic investment round led by investment firm Ci Hub. The investment will be used by Denvik to expand their customer base for Industrial IoT solutions further in Europe and the MENA region (Middle East, North Africa), scale the team and accelerate market adoption of their latest IoT-driven solutions for the global poultry farming market.

Founded in 2007, Denvik Technology's customers include industrial and equipment automation companies in Europe and India. The company is incubated by the Crescent Innovation Incubation Council (CIIC), the incubation arm of Crescent Institute of Science and Technology. Two of Denvik's co-founders are alumni of the institution. Denvik's latest product - Ornithon - is an IoT driven smart solution for helping poultry farmers worldwide improve profitability and operational
