Crescent Innovation and Incubation Council

About CIIC

The Crescent Innovation and Incubation Council (CIIC) is the innovation, incubation, and entrepreneurship arm of B.S. Abdur Rahman Crescent Institute of Science and Technology. With a strong legacy of over 40 years in education and innovation, the institution has consistently nurtured entrepreneurs, researchers, and industry leaders.

CIIC was established with the vision of fostering deep-tech entrepreneurship in emerging sectors such as Electronics, Industry 4.0, Smart & Clean Mobility, Aerospace & Defence Technologies, Healthcare, and Sustainable Innovations. Over the past six years, CIIC has incubated **300+ startups** and created a dynamic innovation ecosystem that supports entrepreneurs from ideation to scale.

Recognized as a One Stop Shop – Business Incubator, CIIC has received support from the Government of India and various private institutions, enabling access to funding, mentorship, infrastructure, and strategic industry connections. Around Rs.54 Crores have been mobilized for startups and ecosystem initiatives by CIIC through Central and State Ministries.

With a strong network of academic, industry, and government partners across South India, CIIC is uniquely positioned to strengthen Tier-2 and Tier-3 startup ecosystems by enabling innovation-driven entrepreneurship.

CIIC is recognized and supported by leading ministries and agencies of the Government of India and the Government of Tamil Nadu.

Abinnovus Bionexus Private Limited

ABINNOVUS
BIONEXUS PRIVATE LIMITED

Dr. Praveen Ramakrishnan
Founder

About Product

Abinnovus Bionexus Private Limited offers handheld electrospinning devices that enable safe, portable, and precise nanofiber production. Lightweight and battery-powered, these devices operate at 10 - 30 kV with insulated designs for user safety. They provide controlled polymer delivery and accurate fiber deposition, ensuring consistent nanofiber quality. Designed for biomedical applications, the devices prioritize sterility, ease of maintenance, and reliable performance, making advanced nanofiber fabrication accessible for research, clinical, and therapeutic uses.

Acadicell Innovations International Pvt. Ltd.

Dr. P. Raghu babu
Founder

About Product

Acadicell specializes in developing advanced products in stem cell and regenerative medicine through students training and research. The company focuses on innovative solutions that promote and tissue regeneration. One of their key developments is a quadruple bag system for efficient cord blood processing. This system enhances the safety and effectiveness of stem cell collection and storage. They have also created an amniotic patch specifically designed for wound healing applications.

Akaththi Farms Pvt. Ltd.

Thirumalaivasan Rajasekaran
Founder

About Product

Akaththi Farms Private Limited is redefining urban agriculture through a decentralized, super-local model for exotic mushroom cultivation. Leveraging its proprietary micro-farm architecture powered by kaani intelligence, the company converts underutilized urban spaces such as rooftops, balconies, and commercial areas into high-yield farms within hours. This approach reduces reliance on large-scale facilities while delivering fresh, organic, nutrient-rich mushrooms to urban consumers.
