FOREWORD & MESSAGES

M. Parvez Alam

Executive Director

Crescent Innovation and Incubation Council &
AIC - Crescent Innovation and Incubation Council

As Crescent Innovation and Incubation Council (CIIC) celebrates five years of remarkable progress, we reflect on its journey as the innovation arm of B.S. Abdur Rahman Crescent Institute of Science and Technology (BSACIST). With 40 years of legacy in nurturing entrepreneurs, BSACIST and CIIC have been instrumental in promoting “deep tech” entrepreneurship in Life Sciences, Industry 4.0, and other advanced sectors. Over the past five years, CIIC has been recognized through funding support of ₹34 crore from eight Union Ministries of India and the Government of Tamil Nadu. We nurtured 200+ startups, raising around ₹278 Cr from both the Government of India and private investments, creating over 1,560 jobs in the process. CIIC is empowered to provide comprehensive assistance to startups, helping them scale into profitable enterprises. CIIC to offer the Five 'M's – Mentor, Money, Market, Machineries, and More value-added services – ensuring that startups receive the resources, guidance, and opportunities they need. This support transforms innovative ideas into sustainable business models, driving interdisciplinary progress and fostering both national and international growth. Even in the face of global economic slowdowns, CIIC has remained resilient, nurturing deep tech startups with a focus on innovation through technologies like Deep Tech, AI, Biotechnology, and Climate Tech. Government partnerships with private corporations and global investors will further fuel growth, fostering a collaborative environment for scaling innovation. This inclusive and technologically advanced ecosystem will not only strengthen India's domestic economic growth but also position the country as a global leader in solving critical challenges through innovation. This shift will be driven by increased digital penetration, robust government support, and the success of regional incubators. Looking ahead to 2030, the decentralization of the startup ecosystem is set to be a crucial development, with Tier-2 and Tier-3 cities and rural areas poised to become major contributors. This shift will be driven by increased digital penetration, robust government support, and the success of regional incubators. CIIC has spread its wings in Chennai, Madurai and Bangalore. In 2023, CIIC achieved a historic milestone, becoming the first private business incubator from India to win the prestigious ESG Rising Star Award from UBI Global in Ghent, Belgium. This recognition underscores CIIC's excellence in fostering sustainable and socially impactful startups. Our dedication to inclusivity and entrepreneurship, particularly in underserved regions, has set a benchmark for the future of innovation in India. As CIIC moves forward, it continues to shape the future of entrepreneurship in both urban and rural areas, empowering the next generation of deep-tech entrepreneurs through its visionary programs and ecosystem support.

Mr. Abdul Qadir A. Rahman Buhari

Chairman - Crescent Innovation and Incubation Council
Pro Chancellor - B S Abdur Rahman Crescent Institute
of Science and Technology

Indian startup funding saw a significant surge in the first eight months of 2024, marking a 53.1% increase compared to the same period in 2023. According to a recent report, Indian startups secured USD 7.5 billion in venture capital funding from January to August 2024, up from USD 4.9 billion during the corresponding period last year. And it's a proud moment for me to mention that CIIC startups are making their early entry towards fundraising.

In an impressive five-year journey, CIIC has established itself as a key player in the startup ecosystem by forging over 98 strategic partnerships with various stakeholders. Their impact is evident in its financial portfolio with startups reaching a combined valuation of 1,800 Crores and generating a five-year sales turnover of 500 Crores. CIIC's success in fundraising is marked by securing 300 Crores in private investment and 3 Crores in government grants, demonstrating strong investor confidence and Govt Initiatives Startup India & Startup Tn support for its mission to nurture innovative startups.

We committed to nurturing talent and supporting entrepreneurial journeys truly aligns with its vision of creating a resilient, inclusive, and sustainable startup ecosystem. By expanding its incubation support, especially through strategic co-working spaces in key locations like Seethakathi Estate, Chennai and ETA Mall, Bangalore, CIIC is not only fostering innovation but also providing entrepreneurs with the necessary resources, mentorship, and networks. This holistic approach ensures that startups are empowered to address real-world challenges while actively contributing to sustainable development—a crucial element for shaping the future of entrepreneurship. The 4th Mega Demo Day is the expression of the togetherness of CIIC team and startups towards the Tamil Nadu dream of \$1 trillion economy by 2030. My best wishes to Mr. Parvez Alam ED and his team.

Mr. BSA Arif Buhary Rahman

Director - Crescent Innovation and Incubation Council
President - B S Abdur Rahman Crescent Institute of
Science and Technology

The startup landscape in India is thriving, thanks to the growing entrepreneurial spirit showcased by the young generation, currently India is home to 110+ unicorns, 5,000+ angel investors, 1,400+ venture capitals and 1,100+ private equity firms. There are 1,200+ incubators and accelerators engaged in various support and training through workshops and mentorship programs, while also helping these entrepreneurs identify new investors, partners and customers.

As per the industry estimates, the startups have spread across over 670+ districts of the total 806 in India. Major cities like Bengaluru, Hyderabad, Chennai, and Pune host a large pool of tech graduates and have become talent hubs, making them the favourite destinations for VCs and tech giants.

CIIC plays a crucial role in motivating students to engage with the startup ecosystem by fostering industry-academia collaboration. With a mentor pool of over 100 experts across various sectors, CIIC provides students with invaluable guidance and insights, helping them navigate the entrepreneurial landscape. By connecting students with industry leaders, startups, and academia, CIIC ensures that they receive the necessary support, mentorship, and exposure to real-world business challenges, enabling them to develop innovative solutions and transform ideas into successful ventures. This collaborative approach not only equips students with entrepreneurial skills but also strengthens the bond between academia and industry.

I wish them continued success as they explore new opportunities in the startup ecosystem. With the support of CIIC, their entrepreneurial journey is poised to thrive, backed by a strong network of mentors, industry connections, and academic collaboration. May their innovative ideas flourish and contribute to shaping a brighter, more dynamic future for the entrepreneurial landscape

Ms. Qurrath Jameela

Chancellor, B S Abdur Rahman Crescent Institute of Science and Technology

India's startup ecosystem has witnessed explosive growth, with a remarkable milestone of 1.4 lakh recognized startups. Of these, an impressive 67,499 have at least one-woman director, highlighting the increasing participation of women in entrepreneurship. The presence of women in leadership roles is not just a win for gender equality also a testament to the strength and resilience of female entrepreneurs.

However, while challenges like gender bias, including limited diversity within VC funds and fewer opportunities for women, are still persistent in the larger startup ecosystem, these headwinds have not stopped women from proving their might and becoming true bellwethers of change.

Notably, India's current shift towards a more supportive socioeconomic environment for women is spearheaded by women themselves. Recent statistics reveal that 14% of entrepreneurs in India are women. Furthermore, businesses led by women constitute more than 20% of the country's MSME sector. The startup world has come a long way since the early 2000s, and so have the women in entrepreneurship. We will support & guiding women entrepreneurs to access vital support through government schemes and Livelihood. By focusing on Tier 2 and Tier 3 cities, LBI is democratizing access to entrepreneurial support, fostering innovation in underserved areas, and contributing to balanced regional development.

Additionally, CIIC connect women entrepreneurs with government initiatives & Corporates looking to fulfil their needs by supporting women in business. Our guidance ensures that women entrepreneurs can effectively leverage these resources to fuel their growth and success. I wish the very best to the CIIC team.

Mr. Khalid A. K. Buhari

Director, Crescent Innovation and Incubation Council
Board Member, B S Abdur Rahman Crescent Institute of
Science and Technology

CIIC is an innovation hub that provides a program to help students develop their technological skills and creative thinking. They have access to AI-supported learning platforms that give them the opportunity to explore fields such as quantum computing, biotechnology, and climate science in great detail. This helps students work on real-world projects and gain industry-relevant skills.

Looking ahead, CIIC is expanding its innovation ecosystem by participating in the Ministry of Education's School Innovation Council programs. These programs, along with the existing Intel Unnati Lab, aim to support young innovators comprehensively. The goal is to encourage hands-on STEM learning and foster a culture of creativity and problem-solving in educational institutions. The expanded framework also aims to prepare students to take part in events like the School Innovation Council Contest & Junior Smart India Hackathon, where they can showcase their innovative solutions on a national stage.

By combining these initiatives, CIIC is creating a strong pipeline of young talent, nurturing their ideas from conception to execution, and ultimately contributing to India's innovation landscape. This approach not only enhances students' technical skills but also instills an entrepreneurial mindset, setting the stage for future breakthroughs and start-up ventures.

Mr. Syed Mohammed Bukhari

Director - Crescent Innovation and Incubation Council
Board Member, B S Abdur Rahman Crescent Institute
of Science and Technology

It is my immense pleasure to welcome you to Crescent Innovation Incubation Centre's 4th Mega Demo Day, a culmination of our unwavering commitment to nurturing innovative spirits and disrupting the status quo. Today, we celebrate the entrepreneurial zeal of our startups, who have embarked on a journey to redefine the future.

At CIIC, we believe that innovation is the lifeblood of progress. Our Global Outreach Mission (CGOM) and the Global Hybrid Accelerator project have been instrumental in scaling up our high-growth startups, bridging geographical boundaries and fostering collaborations. These initiatives have enabled us to tap into the collective potential of innovators worldwide.

As we gather here today, I am reminded of the power of entrepreneurship to drive positive change. Our startups have demonstrated remarkable resilience, adaptability, and creativity, tackling some of the most pressing challenges facing our world.

To our startups, I offer my heartfelt congratulations on reaching this milestone. Your tireless efforts, guided by CIIC's mentorship and support, have led to breakthroughs that will resonate across industries and communities.

To our partners, investors, and ecosystem stakeholders, I extend my gratitude for your unwavering support. Your trust in our vision has enabled us to create a vibrant ecosystem that empowers innovators.

As we look to the future, I reaffirm CIIC's commitment to:

1. Fostering a culture of innovation and risk-taking.
2. Providing access to cutting-edge resources and expertise.
3. Facilitating meaningful connections and collaborations.

Today's Demo Day marks a new chapter in the CIIC story. I invite you to join us on this journey, as we continue to:

"Empower Innovation. Transform Futures."

Thank you.

Mr. Ashraf Buhari Rahman

Director - Crescent Innovation and Incubation Council
Board Member, B S Abdur Rahman Crescent Institute
of Science and Technology

Crescent Innovation & Incubation Council serves as a dynamic hub for nurturing innovation and entrepreneurial spirit within the academic ecosystem. This multifaceted organization extends its support to a diverse group comprising students, faculty members, and alumni, creating a robust network of innovators and mentors.

At its core, we focus on fostering a culture of innovation by facilitating mentorship programs that pair experienced entrepreneurs with aspiring student innovators. This mentorship not only provides valuable guidance but also helps bridge the gap between theoretical knowledge and practical application in the business world.

By actively connecting students and faculty with established startup entrepreneurs, we create invaluable opportunities for knowledge exchange, networking, and potential collaborations. These connections often lead to internships, project partnerships, or even future employment prospects for students.

Furthermore, CIIC & BSACIST places a strong emphasis on motivation and inspiration, often showcasing success stories of entrepreneurs. These real-world examples serve as powerful motivators, demonstrating to students and faculty alike that with dedication, innovation, and the right support system, their entrepreneurial dreams can become a reality. Through these comprehensive efforts, CIIC not only supports individual growth but also contributes to the broader goals of fostering innovation, driving economic development, and creating a self-sustaining ecosystem of entrepreneurs within the academic community.

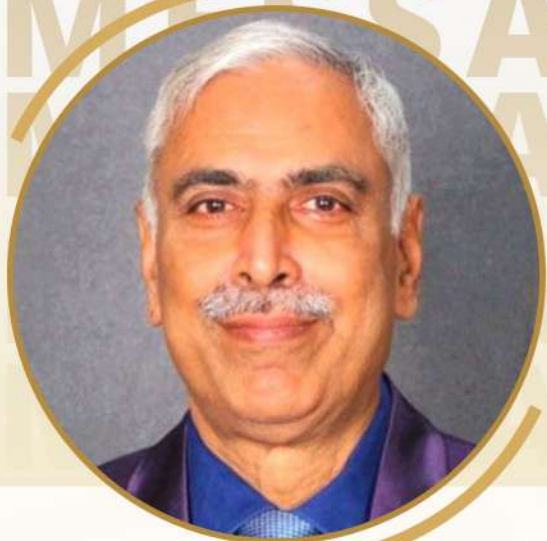

Prof. Dr. T. Murugesan

Director - Crescent Innovation and Incubation Council
Vice Chancellor - B S Abdur Rahman Crescent Institute
of Science and Technology

B.S. Abdur Rahman Crescent Institute of Science & Technology is committed to building an ecosystem that fosters innovation and entrepreneurship at the institutional level. This involves the creation of infrastructure and a conducive environment where students and faculty are encouraged to develop innovative solutions to real-world problems.

Organizing various activities such as workshops, seminars, hackathons, and boot camps that focus on innovation, IPR, start-up methodologies, and business model creation. These activities are designed to inculcate the entrepreneurial mindsets among students and faculty. The Centre for IPR and Technology Transfer Office at CIIC, are dedicated to recognizing and encouraging original and novel research contributions, both from within the institution and externally. These efforts are expected to enhance the institution's research and development initiatives significantly.

In the ever-evolving landscape of education, the Institution's Innovation Council (IIC) Regional Meet 2023 stands as a beacon of collaboration, knowledge dissemination, and visionary thinking. Hosted in dynamic partnership with the Crescent Innovation and Incubation Council (CIIC) at B S Abdur Rahman Crescent Institute of Science and Technology (BSACIST), this event, convened on 1st December 2023, marked an important milestone in our collective journey towards fostering a culture of innovation and entrepreneurship within the academic sphere. CIIC on its incredible five-year journey to continue many more years of groundbreaking achievements and transformative impact!

Dr. N. Raja Hussain

Director - Crescent Innovation and Incubation Council
Registrar, B S Abdur Rahman Crescent Institute of
Science and Technology

B.S. Abdur Rahman Crescent Institute of Science and Technology (BSACIST) and the Crescent Innovation and Incubation Council (CIIC) have forged a powerful alliance to support students in their innovative journey and deepen their understanding of the startup ecosystem. This collaborative effort aims to cultivate an entrepreneurial mindset among students, equipping them with the knowledge, skills, and connections necessary to thrive in the dynamic world of innovation and entrepreneurship.

Through a multifaceted approach, BSACIST integrates startup and innovation modules into its MBA - IEV curriculum, while CIIC leverages its extensive network to connect students with industry experts across various sectors. This synergy manifests in a rich tapestry of initiatives, including immersive startup ecosystem programs, personalized mentorship schemes, industry expert lecture series, hands-on innovation challenges, and hackathons.

Students benefit from startup simulation workshops, gaining practical experience in building and pitching business ideas, while also having access to state-of-the-art innovation labs and makerspaces for prototyping their concepts. The partnership extends to facilitating internships with innovative companies, providing incubation support for student-led startups, and organizing networking events that bridge the gap between academic theories and real-world entrepreneurial practices.

By focusing on sector-specific innovation tracks, research commercialization, and global innovation exchanges, BSACIST and CIIC are not just preparing students for the current startup landscape but are also equipping them to shape the future of innovation. This comprehensive support system, bolstered by continuous feedback and improvement mechanisms, creates a nurturing environment where students can explore, innovate, and transform their ideas into impactful ventures, ultimately contributing to the broader goals of economic growth and technological advancement.

(A Section 8 Company Under Companies Act 2013)

EXECUTIVE SUMMARY

BSA CRESCENT INSTITUTE OF SCIENCE AND TECHNOLOGY

B. S. Abdur Rahman Crescent Institute of Science and Technology (BSACIST) was founded by Alhaj Dr. B. S. Abdur Rahman Sahib. Through the long history of 40 years of excellence, the institution has offered access to a wide range of academic opportunities. With 54 programmes, grouped under 12 schools, 31 undergraduate programmes, 23 postgraduate programmes, and Ph.D (all departments). BSACIST is a rising stalwart in higher education with promising quality, security and placement.

VISION

BSACIST strives to be a 'Research Intensive Institution' through various quality enhancement and sustainable initiatives..

MISSION

- To offer Ph.D programme in all the departments of the institutions
- To offer Research Fellowships (JRF & SRF) in all the departments to attract young talents
- To conduct periodical review meetings for research scholars to ensure quality
 - To disseminate the research findings through publications
 - To introduce innovative schemes to encourage quality research and to increase number of research publications
- To introduce a conducive ambience so as to promote research culture

SALIENT FEATURES

- Accredited with 'A+' grade by NAAC
- Crescent Innovation & Incubation Council (CIIC)- a Startup Incubator with 121 startups
- Career guidance & counselling
- Soft skill development to enhance employability

Crescent
Innovation
Incubation
Council

(A Section 8 Company Under Companies Act 2013)

1. CENTRE FOR LIFE SCIENCES

Crescent Incubation and Innovation Council received a fund of ₹1.80 Crore from BioNEST, BIRAC, Department of Biotechnology, Ministry of Science & Technology, Government of India. The funds were used to establish well-equipped labs for startups, particularly in the fields of Molecular Biology, Microbiology, and Plant Biotechnology.

FACILITIES :

- I. Microbiology Lab
- II. Molecular Biology Lab
- III. Cell Culture Lab
- IV. Bio Process Lab
- V. Microalgal And Nano Biotechnology Lab
- VI. Food Testing lab - NABL
- VII. Analytical Lab
- VIII. Instrumentation Lab
- IX. Plant Tissue Lab
- X. Computational Biology Lab

Plant Tissue Culture Lab

Molecular Biology Lab

Microbiology Lab

Cell Culture Lab

2.CENTRE FOR INDUSTRY 4.0

Centre of Industry 4.0 have partnered with Intel to establish the Intel Unnati Data-Centric Labs. This collaboration has enabled us to create high-quality facilities with a vibrant community of experts and mentors in the Industry 4.0 domain. This ecosystem will help recognize and nurture potential startups and early-stage aspirants.

i) Intel - AI/ML Lab

FACILITIES :

AI/ML Lab has state-of-the-art lab facilities in associated with Intel. It is one of its kind to conduct advanced research activities in the field of AI/ML. We are also authorized to conduct intel-certified skill development courses for Start-ups, Students and Faculties.

A graphic titled "INTERNET OF THINGS" on a blue background with a network of white dots and lines. On the left, a white hand holds a smartphone displaying a red target icon. A cloud with a Wi-Fi symbol and up/down arrows is above the phone. Various smart devices are connected to the phone and each other: a pair of glasses, a security camera, a lightbulb, a house with a Wi-Fi symbol, a car, a speaker, a game controller, a washing machine, a padlock, a smartphone with a dollar sign, a globe, a refrigerator, a speech bubble, a music note, a shopping cart, a fan, and a battery. The devices are interconnected by a web of lines, representing the Internet of Things network.

iii) Intel - Cloud Computing Lab

The infographic features a central circle labeled "CLOUD COMPUTING" with a rainbow gradient. Six lines radiate from this center to six numbered circles (1-6), each with a different color. Each numbered circle is connected to a white rectangular box containing a feature name and a corresponding icon in a colored circle.

- 1** Great availability of resources (Icon: Network diagram)
- 2** On-demand self service (Icon: Person with gear)
- 3** Easy maintenance (Icon: Wrench and screwdriver)
- 4** Pay as you go (Icon: Hand holding coin)
- 5** Automatic system (Icon: Server rack)
- 6** Large network access (Icon: Group of people)

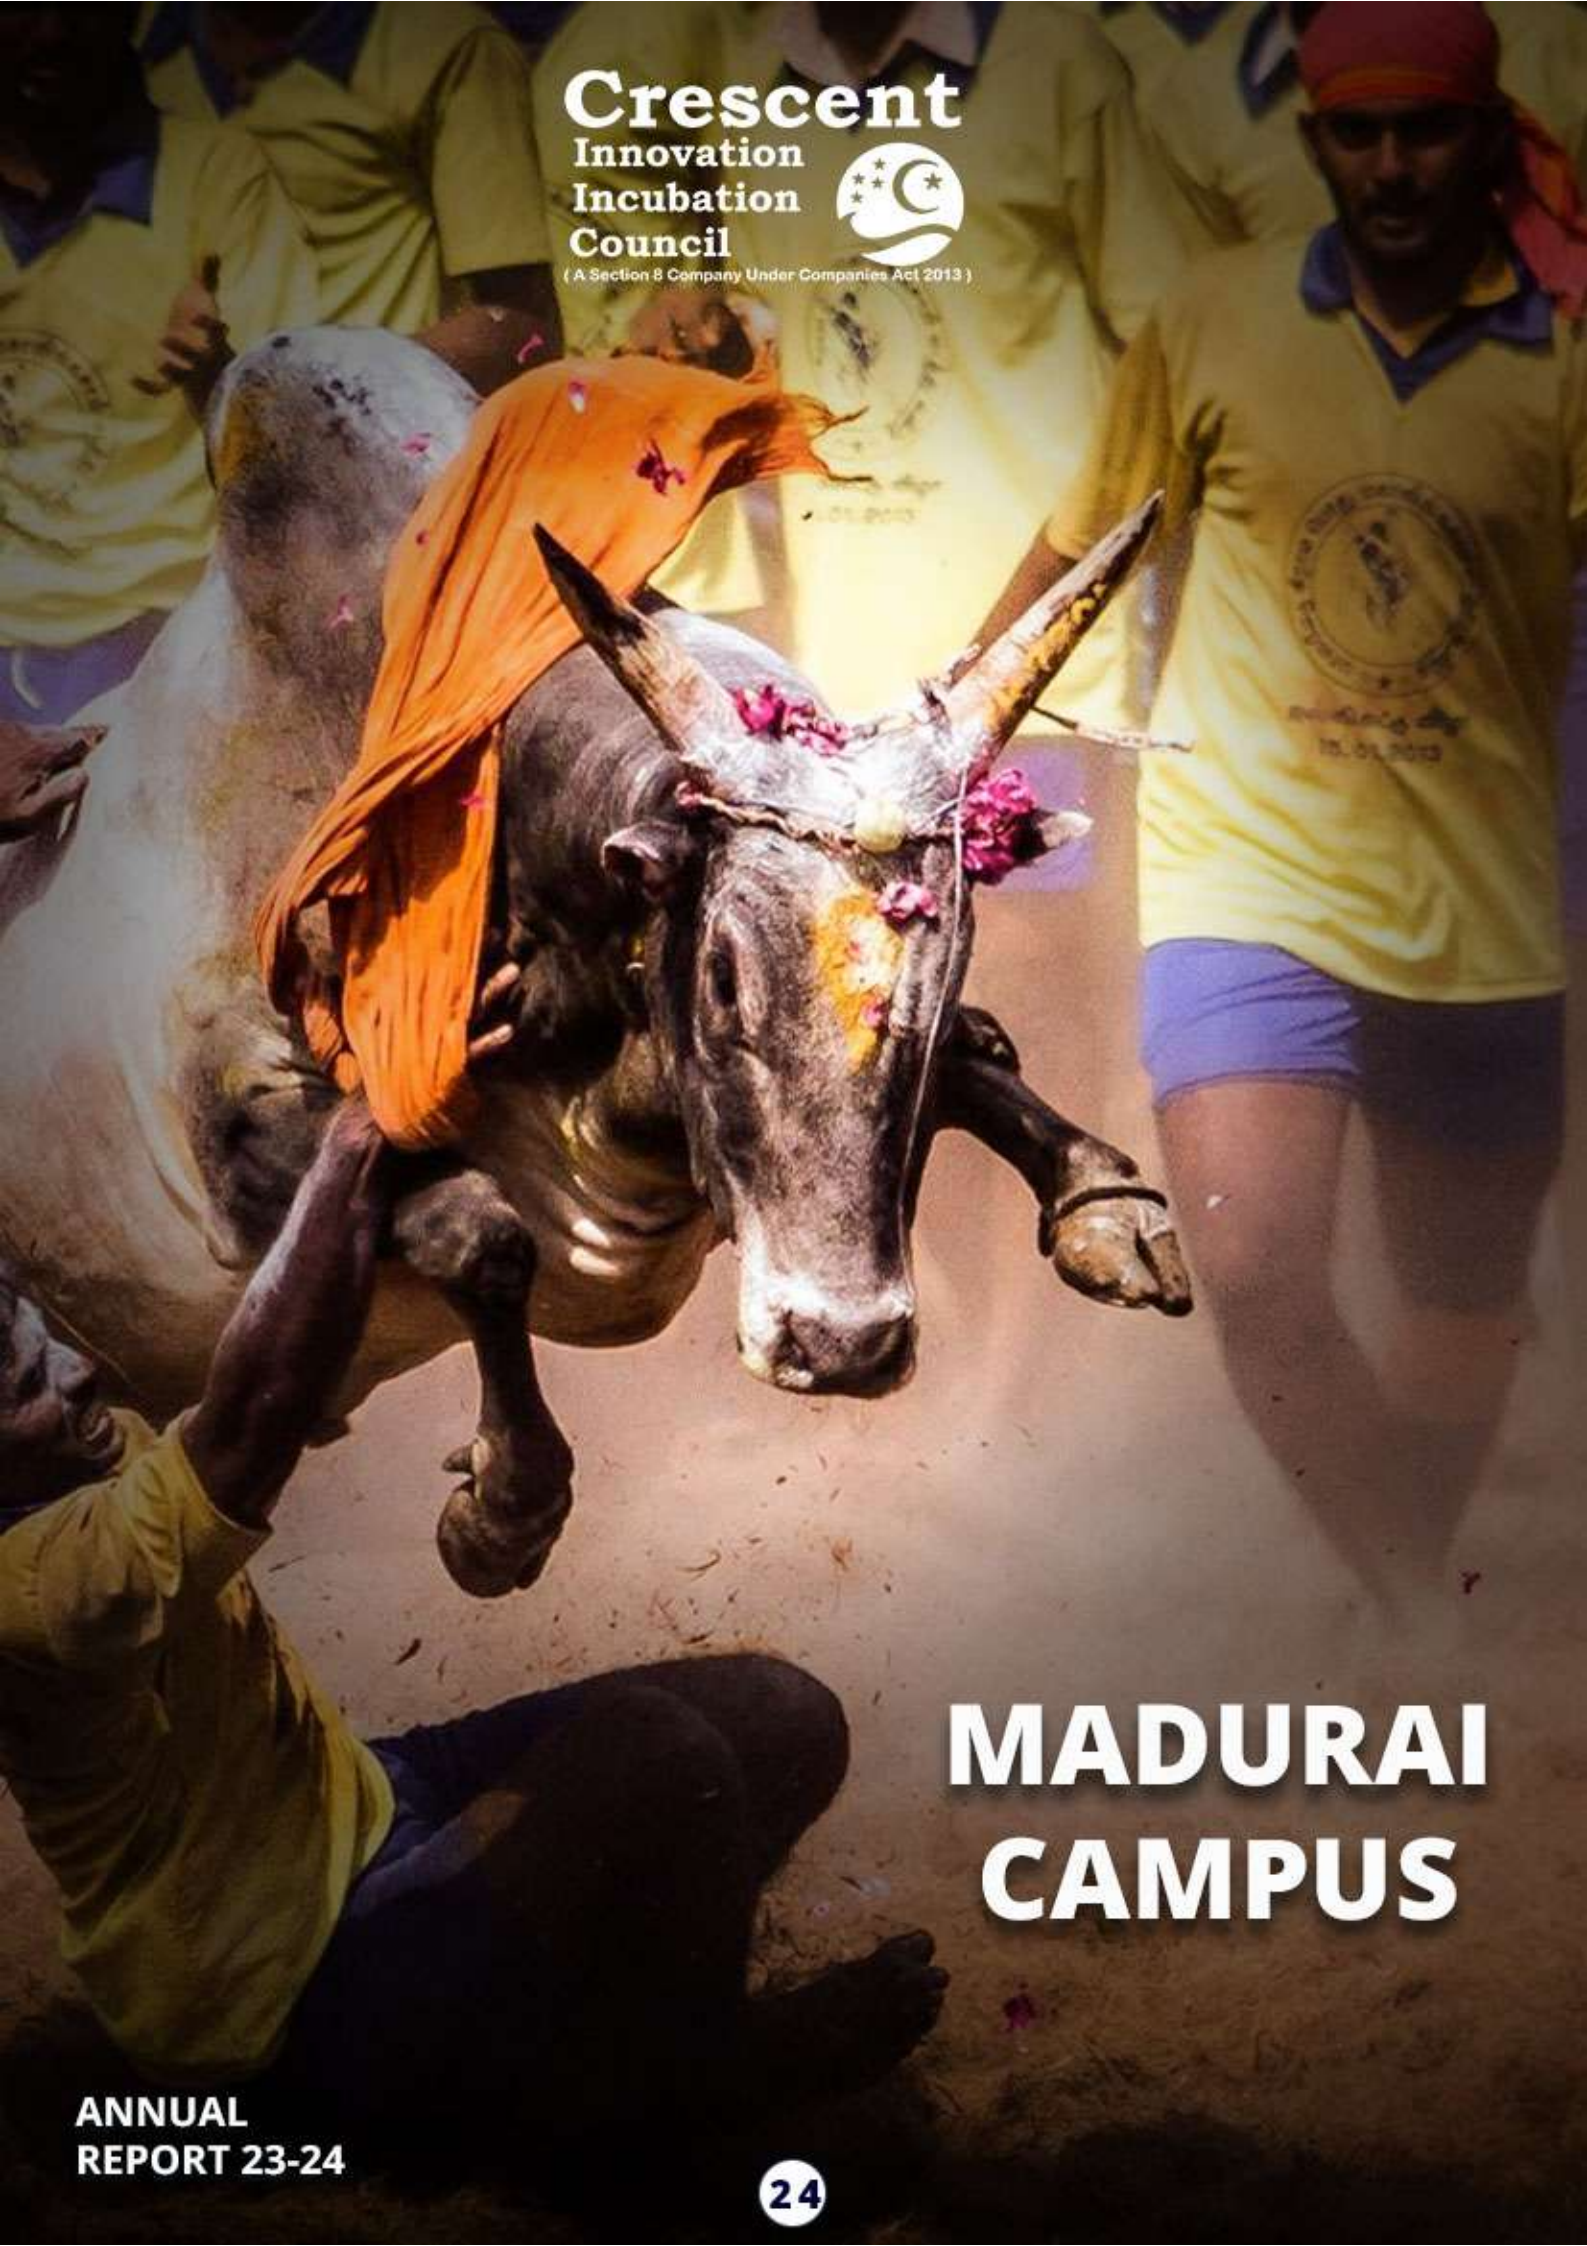

3. CENTRE FOR IPR & TTO

CIPR & TTO protect the innovative ideas of the inventors from commercial exploitation and handles the IP and promote transfer and commercialize patented technologies

Activities:

- Conducting awareness programs on IPR and technology transfer for Educational Institutes, Startups, and Industry MSME
- Celebrating IP day in association with the IPR office Chennai.
- Filing and Prosecution of Patents, Trademarks, Design registrations, and Copyright applications
- Filing of IPR applications under SIPP scheme for Startups
- Filing PCT applications for Startups and University
- Participation and Membership in STEM conferences for technology transfer
- Licensing of technology from University to Industry

MADURAI CAMPUS

CIIC has expanded to Madurai to nurture rural startups from Tier 2 & Tier 3 cities of Tamil Nadu.

CIIC will tap innovation arising from rural areas by nurturing the students from universities & colleges of Tier 2 & Tier 3 cities by providing them with entrepreneurial skills, taking these ideas and innovation to the global market reach. Nurturing rural innovations arising from locations within a radius of 100km from CIIC-Madurai office.

- Involving students of food processing to acquire skills in processing & marketing techniques
- Imparting training to learn the state-of-art-techniques for business promotion
- Empowering women of self-help groups of the region to practice the scientific way of production, packing and marketing their own food products
- CIIC Madurai currently incubated 20+ Start-Ups and having 10,000 Sq.ft facility for Co-Working Space.

Crescent Innovation and Incubation Council (CIIC)

Problem Statements

Challenge 1 - Integral Power Solution for Smart Gear Ecosystems P2W

- The primary aim of this challenge is to find an advanced integration power solution for incorporating smart gear technology onto motorbikes. Gear refers to the specialized clothing and protective equipment worn by riders to ensure safety, comfort, and functionality while riding motorcycles. Some common types of gear worn by riders are helmets, jackets, riding suit, boots, gloves communication systems, armour and bite layers
- Currently, the smart garments and helmets require batteries and power banks which are limited in power, run time and is a major pain point for the rider where a recharge solution would require a system that could be an integral part of the P2W, providing continuous power while riding. We are looking for innovative solution that seamlessly integrate power sources, such as efficient charging systems, to

CIIC bags 'ESG Rising Star' award in Belgium

Chennai, May 21:

Crescent Innovation &
Incubation Council (CIIC)
received the "ESG Rising
Star Award" from UBI
Global, Sweden at the
World Incubation Summit
2023 (WIS23) on 16th
May 2023.

CIIC is the first private
business incubator from
India ever to receive this
UBI Global Award. M.
Parvez Alam CEO and
Director represented on
behalf of CIIC to accept
this prestigious award.
CIIC has been chosen
as the Rising Star based
on its performance in
supporting sustainable
startups, women startups,
livelihood startups, social
impact startups, cleantech
startups & circular economy
startups & governance
mechanisms.

This year's flagship
apex global event was in-
augurated by the Honora-
ble Belgian Prime Minis-
ter Mr. Alexander De

Croo and was attended by
more than 100+ country
representatives.

CIIC is a not-for-profit,
innovation arm of B.S.
Abdur Rahman Crescent
Institute of Science and
Technology (BSACIST),
deemed to be a Uni-
versity. BSACIST has a
long history of 38 years
of nurturing entrepreneurs
and industrialists.

The goal of CIIC is to
encourage "deep tech"
entrepreneurs in the ver-
ticals of Life Sciences, In-

dustry 4.0, and Smart and
Clean Mobility. Across
the last 4 years, 150+
startups are being in-
cubated with a cumulative
valuation of Rs.782 Cr
CIIC startups have raised
around Rs.110 Cr from
both government and pri-
vate entities and around
930 Jobs provided. CIIC
is recognized and funded
Rs.28.99 Cr by the fol-
lowing 6 Union Minis-
tries of India & Govt of
Tamil Nadu.
